

## Regional Access to Obstetrics and Gynaecology

### **Ms DOW question to MINISTER for HEALTH, MENTAL HEALTH and WELLBEING**

My constituent from Burnie wants to know exactly what the government and the minister are going to do to increase access for women on the north-west coast to private obstetrics and gynaecological care. Currently, women are having to travel out of the region if they want to access those services, and I want to know what the government's going do about it.
