

Liquor Licensing System

Mr VERMEY question to TREASURER

I spoke with my constituent Jane from Hobart, who runs a prominent small business in the CBD and regularly requires a liquor licence and permits to operate her business. Jane has raised concerns that the current licencing system appears dated, lacks the convenience of the modern online process and provides limited visibility about how long applications will take to be assessed. Given the Government's commitment to modernise Tasmania's liquor licence systems, what improvements for small business owners will be delivered through the new digital liquor and gaming licencing portal, and how is the work progressing on replacement of the current system?
