

## GP Service in Scottsdale

### **Ms ROSOL question to MINISTER for HEALTH, MENTAL HEALTH and WELLBEING**

My question is from residents of Scottsdale who report that the GP service in Scottsdale no longer has any permanent GPs and is running on locums. There's a lot of concern in the community about that. They've seen what's been done in other areas of the state where there are no GPs available and the way the state government has offered support there. Their question is, what will you do in Scottsdale to help them to have a GP who they can develop a long-term relationship with and get better care from?
