Kings Meadows Community Health Centre Redevelopment Stage 2

Ms FINLAY question to MINISTER for HEALTH, MENTAL HEALTH and WELLBEING

My question is from our constituent, Carolyn Gutteridge. How far have the plans progressed for the redevelopment of stage 2 of the Kings Meadows Community Centre? It will be an opportune time for the community consultation group to be updated and have input at this early stage to ensure that your promises made for further renal services will be accommodated in the new plans. Can you advise the current number of renal dietitians in the south of the state? As you know, we have been advocating for a renal dietician in the north. Mrs Gutteridge had heard there are now three in the south, but that may not be correct. She would be keen for a renal dietitian to be installed in the north.
