

Safe Parking at PCYC and Northern Suburbs Community Hub

Ms FINLAY question to MINISTER for SPORT

I've been contacted by a number of constituents regarding serious and ongoing concerns at the Northern Suburbs Community Hub and PCYC facility. They raised with me that despite this being a significant taxpayer-funded project, families are regularly unable to find safe car parking close by. Residents have provided evidence of congestion and unsafe traffic conditions on a daily basis. They understand the PCYC is actively working with stakeholders to resolve the issue, but they've also indicated this problem stems from decisions made during construction, specifically that the car park, in their opinion, was not properly constructed. At the same time, the Government has announced a further \$18.8 million expansion for additional courts while the existing site remains incomplete. My constituents would like to know: how has the Government allowed a major community sports facility to open without adequate parking and traffic management? Will you, Minister, commit to delivering a safe, properly completed site before expanding it further?
