

Budget – Access to Women’s Healthcare

Ms BURNET question to MINISTER for HEALTH, MENTAL HEALTH and WELLBEING

My question is from Sophie, in North Hobart: I've been struggling to access appropriate care and resources for endometriosis and adenomyosis in the public system and have in the past faced over eight weeks' wait time for a colposcopy, with the result leading to cancer and then preventative surgery, which could have been avoided with earlier intervention. Will access to women's healthcare become harder if there are cuts to the Health Department?
