Loreto Housing Development – Noise Reduction Barriers on Brooker Highway

Ms HADDAD question to MINISTER for HOUSING and PLANNING

My question is from my constituent Jenny in Claremont. When Jenny and other residents moved into the Loreto housing development that backs onto the Brooker Highway in Claremont, she and other residents were advised that noise reduction barriers were to be installed along the highway. It's now been many years, and no such barriers have been installed. There is considerable traffic noise 24 hours a day from the highway. Jenny and her neighbours would like to know what happened to the commitment to noise reduction barriers and when they'll be installed.
