Social Housing Priority

Ms BROWN question to MINISTER for HOUSING and PLANNING

My question is on behalf of Felicity. Felicity is living with a serious health condition and is currently waiting for a heart transplant. At the same time, she's waiting for appropriate social housing closer to medical services. Felicity has now been waiting for four years for suitable housing. Despite her critical medical circumstances, she only is classified as Standard Priority. Minister, given the seriousness of Felicity's circumstances and her urgent need for appropriate housing, how can she still be classified as Standard Priority? How much longer is she expected to wait for appropriate housing?
