

Tomahawk Protection Society – ACEN Wind Project

**Ms ROSOL question to MINISTER for ENERGY and RENEWABLES**

My question is on behalf of the Tomahawk Protection Society. The Tomahawk community has been excluded from the opportunity to participate in the processes outlined for major projects under the *Land Use Planning and Approvals Act 1993*, due largely, but not exclusively, to ACEN's failure to follow best practice community engagement guidelines being advocated by the Tasmanian government and the Australian Energy Infrastructure Commissioner for wind farm developments. The Tomahawk Protection Society have sent you documents providing details of this. Will you and the government stand up for the Tomahawk community and make representations to ACEN to reconsider the Waterhouse component of North East Wind?
